

**“Google” trend information from your plant or lab. Get results in seconds. Type in an expression, view a trend.**

Search PI like you do the web. Enable your teams to run the plant & study the processes that deliver on-time, low-cost, high-quality product.

Many operations managers we meet are fed up with trying to optimize their plants utilizing data that is “trapped” in dozens of excel spreadsheets, or worse yet, simply “trapped” within non-intuitive, difficult-to-use interfaces.

### **ZOOMS is “Google” for PI**

ZOOMS makes your PI data searchable by anyone in your organization by providing an web-enabled search engine for PI. Fast, intuitive, and easy access to information in PI enables your manufacturing workforce to be more productive, more knowledgeable, and more responsive to the market.

### **Using ZOOMS**

ZOOMS is the software product we wished we had when we were working in the plant – it is designed on 2 premises: (1) Data in the 21st century has to be web-enabled and open; (2) Data search has to be as simple as using Google. No 150-page manual or 8-hour training course. Simply try a few searches and you’ll see how easy it is to get at trends, units, batches, or any other manufacturing data parameter.

### **Intuitive Web Search for PI**

#### **Search trend data from PI**

“Google” trend info from your plant or lab. Get results in seconds.

#### **Trends in any browser**

Type in an expression, view a trend. No more mousing around.

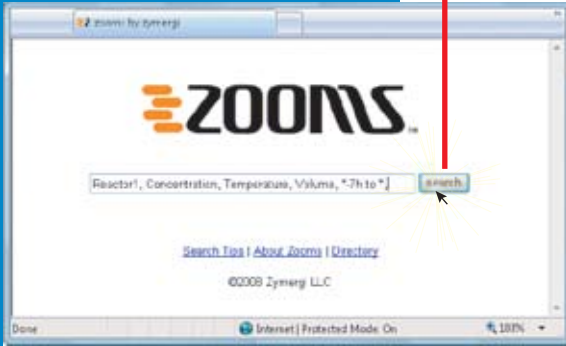

#### **Fits in your PI ecosystem**

PI ProcessBook for experts. ZOOMS for everyone.

#### **Intellisense to help search**

Don’t know what to search for? That is why you’re using ZOOMS.

Type in your search terms in the search control box.

Cursor over graph to see specific data.

Click to get CSV data to download immediately into MS Excel.

Click any hyperlinked text to drill down for more info.

See immediately what parameters are available for the vessel of interest.

Get the details on units and range for each parameter.

### Bottom Line Results

- Less failed batches
- Less failed lots
- Less wasted staff time on frustrating interfaces
- Lower exposure to market & tech transfer risks

### About Us

Based in northern California, Zymergi is a global data solutions company that helps process manufacturers unleash the power of manufacturing data. Through our field service work and software products, we give your operations teams better, faster, and more sophisticated access to your manufacturing data, leading to more insightful analyses, more nimble troubleshooting, and higher levels of operational excellence.

### Benefits

#### Increased productivity

- Less time getting the data, more time analyzing the data.
- Frees up staff capacity as product pipeline booms. Potentially reduces head count if FTEs are dedicated to data

#### More agile manufacturing operation

- Enables mid-course batch optimization measures, instead of having to do a failed-batch post-mortem.
- Decreases batch-to-batch variability
- Facilitates faster, more seamless tech transfers

#### Smarter, more knowledgeable staff

- Unleashes your smartest people with data. Lets them ask questions they never asked before and helps them get to the root cause faster and from multiple angles.
- Enables cross-department collaboration as everyone is looking at the same data.
- Increases development/piloting efficiency so that new processes are better optimized from the get-go.

An OSIsoft partner since inception, Zymergi provides PI field service and purveys web-technologies for enterprise solutions.
